

“The End of Food: How the Food Industry is Destroying Our Food Supply And What We Can Do About It”

The book presents a thoroughly researched, at-times funny, at-times angry, disturbing, illuminating and wholly engrossing case study of everything that is wrong with what we eat today. From the unnatural, bottom-line-driven ways in which crops and animals are raised, to the overwhelming number of non-food substances – some, like genetically modified organisms or trans-fatty acids, added deliberately; others, like salmonella, listeria and E. coli, the accidental byproducts of the heedless quest for speed, uniformity and cost-efficiency – in our food, Pawlick persuasively paints a picture of a food system gone short-sightedly and unwholesomely awry.(...)
