

Weed scientists from Agriculture and Agri-Food Canada (AAFC) have completed evaluations on samples of kochia (*Kochia scoparia*) collected from three fields in Southern Alberta last August and have confirmed the first case of a glyphosate-resistant weed in Western Canada. Two weed species in Canada were previously confirmed as resistant – all found in southwestern Ontario. Giant ragweed was confirmed in 2009 and Canada fleabane was confirmed in 2011. Glyphosate-resistant kochia populations have previously been confirmed in Kansas, Colorado and Nebraska. There are also suspected cases being investigated in North and South Dakota and Montana. (...)
