

"Seeds of Freedom" - A new lens on the story of seed

Scritto da Administrator

For thousands of years, farming communities have entered into a relationship with their land, nourishing their soils and seeds to build resilience and diversity in their local ecosystem. Seeds of Freedom, a new film by The Gaia Foundation and the Africa Biodiversity Network, tells the story of this relationship - the bond between seed and farmer - that today is under threat by the corporate takeover of the food system. (...)
