

"Uranio em Movi(e)mento" will be held 21-28 May 2011 in Rio de Janeiro, in June in São Paulo.

Organisers plan to bring the films in August 2011 to the Brazilian cities of Recife, João Pessoa, Natal, Fortaleza, and later to Salvador.

It is, according to the organisers: "Latin America's first film festival to highlight nuclear and radioactive issues. It is an annual event with 2 international competitions. The Uranium Film Festival wants to inform especially the Brazilian, Latin American and Portuguese speaking societies and stimulate world-wide the production of independent documentaries and movies about the whole nuclear fuel cycle, about the dangers of radioactivity, about the environmental and health risks of uranium exploration, mining and processing."
