This year, the largest annual conference on European environment policy turns the spotlight on biodiversity. Over some 30 sessions, the conference will address the state of biodiversity and nature in Europe and the world, the benefits they bring, present-day pressures on them, and possible solutions to the current rates of loss. The path to be taken by EU policies on biodiversity and nature policies post-2010, the economic dimension of biodiversity, ecosystem services and Natura 2000 will also be investigated.
