

Investing in post-harvest technologies to reduce food losses could significantly increase the food supply in sub-Saharan Africa, according to a new FAO/World Bank report released today as technical experts from around the region meet to discuss the issue.

The report, Missing Food: The Case of Postharvest Grain Losses in Sub-Saharan Africa, produced in collaboration with the UK's Natural Resources Institute, estimates the value of post-harvest grain losses in sub-Saharan Africa at around \$4 billion a year. (...)
